Medical Problems of Performing Artists
Information for Prospective Authors (Abridged)

Medical Problems of Performing Artists provides a worldwide forum for professionals involved in all fields of practice and research related to the medical, physiological, and psychological issues affecting performing artists, including musicians, dancers, singers, actors, and others.

MPPA is pleased to consider original research studies, case reports, personal essays, review articles, book reviews, and letters to the editor with the understanding that they have not been published, posted online, or submitted for publication elsewhere.

Please consult the MPPA website for more complete instructions: www.sciandmed.com/mppa/authors.aspx

Manuscripts: Manuscripts should be submitted with a cover letter indicating the name of the corresponding author, address, telephone / fax numbers, and e-mail address. Authors must disclose any financial support or grants supporting this research, including grantee's name and identifying grant numbers. Authors must disclose any financial arrangements or organizational affiliations that might constitute a conflict of interest or influence interpretation of their study results. Prior presentation or publication, including preprints, must be noted.

Submitted manuscripts should be accompanied by the following:

1. Author-suggested reviewers Authors submitting papers to MPPA should include the names of 4 potential qualified reviewers for their paper. Reviewers should have demonstrated published expertise in the topic area, be from outside the author's institution, and not a research partner. Please provide names, institutional affiliation, and email.

2. Ethical approval: All studies involving human subjects require ethics committee and/or institutional review board (IRB) approval, which should be clearly noted in the cover letter and in the Methods section of the paper. This includes interventional studies but also observational studies, surveys, and interviews. Case reports require the subject's written permission. If an IRB determines that a study is exempt, a letter from the IRB granting the waiver should be submitted with the manuscript.

3. Authors Disclosure/Copyright: All persons designated as authors must meet the criteria for authorship and have participated sufficiently in the work to take public responsibility for the paper. A statement must be included, signed by all authors, that says: "All authors certify that we have participated substantially in the conception, design, analysis, and writing of this study, and we have approved the manuscript and agree with its submission to Medical Problems of Performing Artists. This manuscript represents original, unpublished material and is not under consideration for publication elsewhere, nor has it been posted on the Internet for public access. In consideration of MPPA's taking action in reviewing and editing my submission, the authors undersigned agree to transfer, assign, or otherwise convey all copyright ownership to Science & Medicine, Inc., in the event that such work is published in MPPA. If the paper is accepted for publication, the authors agree that it will not be published elsewhere or posted on the Internet, in whole or part, without the written consent of MPPA."

Format: Manuscripts should be prepared in accordance with International Committee of Medical Editors Uniform Requirements for Manuscripts (icmje.org). Papers are to be submitted in standard word-processing format (e.g., MS Word) via e-mail. If the file is large, contact the publisher for other submission options.

Authors requiring assistance with English language for their papers are encouraged to contact a professional translation service before submission of their manuscript.

To ensure studies are described in enough detail to be evaluated in peer-review and by readers, authors should follow accepted reporting guidelines for different study designs: STROBE for observational studies, PRISMA for systematic reviews, and CARE for case reports. Review manuscripts, including systematic reviews, must describe the methods used for locating, selecting, and synthesizing data.

- **Text length** will vary with content, to approximate:
  - Original articles—3500 words, 40 refs, 6 tables/figures
  - Brief/case reports—1800 words, 15 refs, 3 tables/figures
  - Letters—750 words, 5 refs, 1 table/figure
- **Title page** should include: title; authors, with highest earned degrees, titles, and institutional affiliations; name, address, phone, and e-mail address of the corresponding author; acknowledgment of grants or funding, conflicts of interest, and prior presentation.
- **An abstract** not exceeding 250 words should summarize the objectives, methods (PICO), results, and main conclusion of the study.
- **IRB approval**, when applicable, must be noted in the text (Methods).
- **Borrowed materials**, including illustrations or tables taken from other publications or sources, must be fully identified, and written permission to reproduce this material must be obtained from the original publisher. Copies of permission letters must be included when submitting the manuscript.
- **Tables and illustrations** (figures) should be cited in numerical order in the text. Tables should be provided in word-processing format. Figures should be professionally prepared or generated by spreadsheet or presentation software (e.g., Excel, PowerPoint, etc.). Figures should be submitted as high-resolution digital files in JPEG or TIFF format, 300 dpi or higher preferred.
- **Videos** associated with the study can be posted on the journal website.
- **Cost for printing color figures** in the journal is $350 per figure.
- **References** should be listed numerically in the order they appear in the text, not alphabetically. For reference style, see the National Library of Medicine "Citing Medicine": [https://www.ncbi.nlm.nih.gov/books/NBK7256/](https://www.ncbi.nlm.nih.gov/books/NBK7256/). Material from online sources should list the URL and date accessed. DOI numbers must be included for all references. Examples are shown below.

Review Process: All manuscripts are read by the editor and are subject to peer-review by the editors, editorial board, and/or other experts in the field. Manuscripts are judged on their originality, methods, presentation, and appropriateness for the journal. MPPA adheres to ICMJE and COPE guidelines.

Accepted manuscripts are copyrighted for grammar and clarity, to conform to journal style, and to meet space limitations. Prior to publication, the corresponding author will receive PDF proof of the edited article to review editorial changes and is responsible for proofreading the article in entirety. After publication, articles will be posted on the journal's website, www.sciandmed.com/mppa.

Copyright: Manuscripts accepted for publication are copyrighted by the publisher in the issue published and may not be reproduced elsewhere or posted in whole or part on the internet without written permission.

Open Access: Authors have the option to publish their paper under Open Access, whereby, for an Article Processing fee, their paper will be made freely available online on publication. Information will be provided with the author's proof and payment must be made before papers can be posted online. The charge for Open Access is $1,800 USD per paper (subject to change).

Digital Archives: MPPA on written request will grant permission to authors to post their republication manuscripts in university archives, NIH public access, or similar centrally organized repositories required by funding bodies, provided the works appear 12 months after publication in MPPA. Only authors who have opted for the journal's Open Access may post their final published PDF. Authors wishing to post copies of their papers on personal websites should post the original manuscript, noting that the paper has been published in MPPA. Posting papers with other services or websites is prohibited without written permission from the publisher.

Manuscripts should be submitted to the journal via e-mail to: mppa@sciandmed.com
